EDUCATION

University of Bristol — MEng Engineering Mathematics, First Class (2024)

- Thesis: Decision-making via random walks
- Modules: Linear Algebra, Stochastic Processes, Optimization theory, Numerical Methods, ML,

EXPERIENCE

Founder and creator, ScrollBuddy (iOS, RN/Expo + Next.js) | Aug 2025 – Present

- Shipped to App Store(24th Aug); first paying user within 48h.
- An anti-screen time tool where you can set limits for your app and only unblock after the limit if your
- Scale/metrics: 3 DAU, D1/7 retention is low 5%, Revenue 22\$, 78 downloads.

Founder, Aviini Ltd (E-commerce) | Jul 2023 – Jan 2025

- Profit $\approx$ £25k over 2 yrs at $\sim$ 25–35% margin.
- Built pricing/ops automations (orders, fees, inventory).

ML Engineer (Part-time) — MyGreenDoor | Jan 2023 – Jun 2023

- k-NN clustering + data pipeline for retrofit recommendations.
- Stack: Python (pandas/sklearn), local model.

Open-Source ML, Encode Club “AI Blueprints” | Feb 2025 – Mar 2025

- Sign-language detection model; awards: \$2,000 + 2,500 Lilypad credits.
- Model: simple neural net, Data: kaggle ASL dataset, Metrics: 70% acc.
- Local host demo (Next.js FE, Python API), utilised IPFS protocol service i.e Lilypad compute & filecoin storage.

Builder, Web App MVPs (Next.js/Vercel) | Jan 2025 – Jul 2025

- thoughts2action — voice $\rightarrow$ transcript $\rightarrow$ structured actions; users [], conv rate [].
- Tai — AI tutor assistant; testers [], NPS [], [key outcome].
- Cartevo — concierge virtual-card prototype; [pilot metric/learning].

SKILLS

- Languages: Python, SQL, coding agents!
- ML/Math: PyTorch, scikit-learn, time-series, optimization, probability, stochastic processes
- Data/Systems: pandas/NumPy, Git, Linux, REST, Docker, Next.js/React, React Native/Expo
- CS: Algorithms & data structures, complexity, testing/CI, profiling
